Advisory Conventions

Four types of advisories are used throughout the user manual to provide helpful information or to alert you to the potential for hardware damage or personal injury. These are Notes, Important, Cautions, and Warnings. The following is an example of each type of advisory.

**NOTE:**
A note is used to emphasize helpful information.

**IMPORTANT:**
An important note indicates information that is important for you to know.

**CAUTION/ ATTENTION**
A Caution alert indicates potential damage to hardware and explains how to avoid the potential problem.

**WARNING!/ AVERTISSEMENT!**
An Electrical Shock Warning indicates the potential harm from electrical hazards and how to avoid the potential problem.

Safety Information

Follow and adhere to all warnings and instructions in this manual. For your safety, please read all safety and operating instructions before using the product. Keep this manual for future reference.

**Precaution on Battery Pack**
**Précaution avec le bloc-pile**

Do Not Expose the Battery Pack to Excessive Heat, or Extreme Heat (Near Fire, in Direct Sunlight for example) Generation of heat, ignition or rupture may result.

Do Not Disassemble, Modify, or Insert Sharp Objects Into the Battery Pack. Electrolyte leakage, generation of heat, ignition or rupture may result.

---

M101B-Series User Guide 1
Do Not Short the Positive (+) and Negative (-) Terminals of the Battery. Generation of heat, ignition or rupture may result. When carrying or storing the device, do not place the battery pack together with articles that may contact electricity.

Ne pas court-circuiter les bornes Positive (+) et Négative (-) de la pile, la génération de chaleur, l'amorçage ou la rupture peuvent être occasionnés. Lors du transport et du rangement de l'appareil, ne pas placer le bloc-pile en même temps que des articles pouvant créer un contact électrique.

Do Not Apply Shocks to the Battery by Dropping It or Applying Strong Pressure to It. Electrolyte leakage, generation of heat, ignition or rupture of battery may occurs.

Ne pas faire subir de choc à la pile en la laissant tomber ou en appliquant une forte pression dessus. Une fuite d’électrolyte, la génération de chaleur, l’amorçage ou la rupture peuvent être occasionnés.

Do Not Charge the Battery Other Than Methods Those Specified In This Manual. If the battery is not charged using one of the specified methods, electrolyte leakage, generation of heat, ignition or rupture may result.

Ne pas charger la pile par d’autres méthodes que celles spécifiées dans ce manuel. Si la pile n’est pas chargée en utilisant l’une des méthodes spécifiées, une fuite d’électrolyte, la génération de chaleur, l’amorçage ou la rupture peuvent être occasionnés.

When the Battery Pack Has Deteriorated, Replace It with a New Battery. Continued use of a damaged battery pack may result in heat generation, ignition or battery rupture.

Lorsque la pile est détériorée, la remplacer par une nouvelle pile. L’utilisation continue d’une pile endommagée peut occasionner une génération de chaleur, l’amorçage ou la rupture de la pile.

Do Not Use the Battery Pack With Any Other Products. The battery pack is rechargeable and is only designed for this specific product. If it is used with a product other than the specified product, electrolyte leakage, generation of heat, ignition or rupture may result.

Ne pas utiliser avec un autre produit La batterie est rechargeable et a été conçue pour un produit spécifique. Si elle est utilisée sur un produit différent de celui pour lequel elle a été conçue, des pertes d’électrolytes et une production de chaleur sont possibles, elle risque également de prendre feu ou de casser.

Do Not Use This Product With Battery Other Than the One Specified.

Ne pas utiliser ce produit avec une batterie autre que celle spécifiée.

General Product Safety
Sécurité générale des produits

This product should not be used near water such as bathtubs, sinks, swimming pools, wet basement, etc.

Ce produit ne doit pas être utilisé près de l'eau comme les baignoires, les éviers, les piscines, les sous-sols humides, etc.

Do not block any ventilation openings. Do not place the product against a wall or in an enclosed space as doing so might impede the flow of cooling air.

Ne pas bloquer les ouvertures de ventilation. Ne pas placer le produit contre un mur ou dans un espace clos de façon à entraver la circulation de l’air de refroidissement.
<table>
<thead>
<tr>
<th>Use only with its transport carriage, stand, tripod, console or table specified by the manufacturer or sold with the product. When using a carriage, move the carriage assembly with the product carefully to avoid damage from falling over.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Unplug this apparatus during lightning storms or when it is not being used for long periods.</td>
</tr>
<tr>
<td>Refer all servicing to qualified service personnel. A technical intervention is required when the apparatus has been damaged in any way, for example if the power cord or plug is damaged, liquid has been spilled or objects have fallen inside the unit, if the product has been exposed to rain or moisture, if it does not operate normally or if it has been dropped.</td>
</tr>
</tbody>
</table>

**Do not place the product near any heat sources such as radiators, warm air intakes, stoves or other heat-generating devices (including amplifiers or other heat producing equipment).**

**Ne pas placer le produit près d'une source de chaleur comme des radiateurs, les arrivées d'air chaud, poêles ou autres produits générant de la chaleur (y compris les amplificateurs ou autre équipement produisant de la chaleur.)**

**Do not disregard the safety that a polarized or grounded connection can provide. A polarized connection consists of two plugs, one of which is larger than the other. A grounded connection has two blades and a third one that is grounded. If the main plug provided cannot be inserted into your outlet, consult an electrician to replace your obsolete outlet.**

**Ne pas ignorer la sécurité qu'une prise polarisée ou une prise de terre peut prévoir. Une prise polarisée se compose de deux fiches, dont l'une est plus large que l'autre. Une prise de terre possède deux lames et une troisième qui est la terre. Si la fiche principale fournie ne peut être insérée dans votre prise, consultez un electricien pour remplacer votre prise obsolète.**

**Protect the power cord from being crushed or pinched, particularly in the area of the plugs, any receptacles used, and the point of exit from the apparatus. Do not break off the ground pin of the power cord.**

**Empêcher le cordon d'alimentation d'être écrasé ou pincé, en particulier dans les zones de prises, des containers utilisés, et du point de sortie de l'appareil. Ne pas casser la broche de terre du cordon d'alimentation.**

**Use only accessories specified by the manufacturer.**

**Utiliser uniquement les accessoires spécifiés par le fabricant.**
Handling and Maintenance

Follow and adhere to all warnings and instructions in this manual. For the longevity of the product usage, please read all operating instructions before using the product. Keep this manual for future reference.

General Guideline

Keep the product at least 13 cm (5 inches) away from electrical appliances that can generate a strong magnetic field such as TV, refrigerator, motor, or a large audio speaker.

Do not place heavy objects on top of the tablet computer as this may damage the display.

The screen surface can be easily scratched. Use with care. Do not use paper towels to clean the display but use the included cleaning cloth. Avoid touching it with a pen or pencil.

Cleaning Guideline

Use a soft cloth moistened with water or a non-alkaline detergent to wipe the exterior of the product.

Gently wipe the display with a soft, lint-free cloth. Do not use alcohol or detergent on the product.

To maximize the life of the backlight in the display, allow backlight to automatically turn off as a result of power management. Avoid using a screen saver or other software that prevents the power management from working.

Pour maximiser la durée de vie du rétroéclairage de l'écran, autoriser le rétroéclairage résultant de la gestion de l'alimentation. Éviter d'utiliser un économiseur d'écran ou un autre logiciel empêchant la gestion de l'alimentation de fonctionner.
Touchscreen Guideline
Guide de l'écran tactile

Use your finger or the stylus on the display. Using sharp or metallic object may cause scratches and damage the display, thereby causing errors.

*Utiliser votre doigt ou le stylet sur l'écran. L'utilisation d'un objet pointu ou métallique peut provoquer des rayures.*

Use a soft cloth to remove dirt on the display. The touchscreen surface has a special protective coating that prevents dirt from sticking to it. Not using a soft cloth may cause damage to the special protective coating on the touchscreen surface. To clean off hard to remove dirt, blow some steam on the particular area and gently wipe away using a soft cloth.

*Utiliser un chiffon doux pour enlever la poussière sur l'écran. La surface de l'écran tactile a un revêtement protecteur spécial empêchant la saleté de se coller à lui. Ne pas utiliser un chiffon doux peut endommager le revêtement spécial sur la surface de l'écran tactile. Pour nettoyer les saletés plus difficiles à enlever, souffler de la buée sur la zone particulière et essuyer doucement avec un chiffon doux.*

Do not use excessive force on the display. Avoid placing objects on top of the display as this may cause the glass to break.

*Ne pas utiliser une force excessive sur l'écran. Éviter de placer des objets au dessus de l'écran cela pourrait provoquer une cassure du verre.*

When there is a noticeable discrepancy in the operation of the touchscreen function (your touch does not correlate to the proper location on the screen), recalibrate the touchscreen display.

*Lorsqu'il y a un écart sensible dans le fonctionnement de l'écran tactile (votre contact ne correspond pas à la bonne position sur l'écran), recalibrer l'écran tactile.*

The object of the declaration described above [A] is in conformity with the requirement of the following EU legislations [B] and harmonized standards [C]. Product also complies with the Council directions [D].

Chapter 2: Getting Started

Thank you for purchasing this rugged Tablet Computer. The rugged design allows you to use it in harsh outdoor environments.

This chapter tells you step by step how to get the Tablet Computer up and running. You will find instructions for the following procedures:

- Unpacking
- Description of Parts
- First Time Operations
- Powering On/Off

Unpacking

Check and identify the standard supplied accessories.

Standard factory shipment list:

- Tablet Computer
- Standard Battery
- Power Adapter
- Power Cord and Plugs
- Capacitive Touch Stylus
- Driver CD
Optional Accessories

Your package may include optional accessories based on your order.

**M101B offers the following optional accessories that can be purchased:**

<table>
<thead>
<tr>
<th>Optional Accessory</th>
<th>Description</th>
</tr>
</thead>
</table>
| **Gigabit Ethernet Adapter**          | • For LAN from 30-pin extension port  
                                             • Length: 10 cm  
                                             • Connector: RJ45, female  
                                             • Gigabit LAN, 10/100/1000 Mbps                                                                                                   |
| **RS232 Ethernet Adapter**             | • For RS232 from 30-pin extension port  
                                             • Length: 10 cm  
                                             • Connector: DB9 Serial RS232 Cable, female                                                                                   |
| **High Capacity Battery**              | • Capacity: 7.4V min. 10280 mAh, typ. 10600 mAh (2S2P)  
                                             • Li-Polymer Battery                                                                                                             |
| **Hand Strap**                         | • Ergonomic hand-strap can help you handle the Rugged Tablet PC much more easily and comfortably.                                      |
| **Battery Charger**                    | • Dual charging bays supporting both BS101 and BL101.  
                                             • LED indicators to show current battery charging status.                                                                         |
| **Vehicle Charger**                    | • Rapidly charges your M101B Tablet PC in your car while you drive  
                                             • Length: 3m                                                                                                                      |
| **Desk Docking**                       | • 4 x USB 2.0 (2 x Rear, 2 x Side)  
                                             • 1 x LAN (10/100)  
                                             • 1 x VGA  
                                             • 1 x RS232                                                                                                                        |
| **Vehicle Docking**                    | • VESA Mounting support  
                                             • 4 x USB 2.0 (2 x Rear, 2 x Bottom)  
                                             • 1 x LAN (10/100)  
                                             • 1 x RS232  
                                             • 1 x GPS ANT SMA  
                                             • 9-36V DC IN with 3-pin terminal block  
                                             • Easy insert and release with Key-Lock                                                                                          |
| **Active stylus**                      | • 2 x Side Buttons (Eraser, Barrel)  
                                             • Support Win7, Win8, Win10, Linux  
                                             • Replaceable Battery 0.9V~1.8V, AAAA*1  
                                             • Pen tip Diameter: 2.0 +/- 0.2mm                                                                                                 |

HotKey For Specific Functions

For the physical buttons on the tablet computer, in addition to its dedicated functions detailed in the previous section, it can also be used to emulate commonly used keyboard key strokes.

Under different scenario, a single physical button or a combination of physical buttons provide different keyboard key strokes, which are specified below:

**Under POST (before Windows boots up):**

<table>
<thead>
<tr>
<th>Buttons</th>
<th>Keystroke</th>
</tr>
</thead>
<tbody>
<tr>
<td>Menu</td>
<td>F7 to enter BIOS setup screen</td>
</tr>
<tr>
<td>Fn1</td>
<td>F6 to enter Recovery Menu</td>
</tr>
<tr>
<td>Fn2</td>
<td>ESC</td>
</tr>
<tr>
<td>Volume Up (+)</td>
<td>Up</td>
</tr>
<tr>
<td>Volume Down (-)</td>
<td>Down</td>
</tr>
<tr>
<td>Menu + Fn1</td>
<td>Enter</td>
</tr>
<tr>
<td>Menu + Volume Up (+)</td>
<td>Right</td>
</tr>
<tr>
<td>Menu + Volume Down (-)</td>
<td>Left</td>
</tr>
</tbody>
</table>

**Under Windows:**

<table>
<thead>
<tr>
<th>Buttons</th>
<th>Keystroke</th>
</tr>
</thead>
<tbody>
<tr>
<td>Menu</td>
<td>Hottab Quick Access</td>
</tr>
<tr>
<td>Fn1</td>

First-time Operation

Inserting Battery Pack

To insert the standard battery pack into the Tablet Computer:

1. Disconnect AC adapter and power cord from the tablet computer.
2. Turn the tablet computer over, back facing up.
3. Locate the Battery Lock Latch and push it to the “Unlocked” position.
4. Locate the Battery Release Slider that is spring-loaded. Pull back and hold.
5. Insert the battery on the connector-pins side first, and then lower the battery into the battery compartment. Continue to hold the Battery Release Slider before battery is fully inserted.
6. Make sure the battery is completely lowered into the compartment before letting go the Battery Release Slider. Battery will be flat against the housing once fully inserted.

Removing the Battery Pack

1. Power off the tablet computer (or put it to sleep). Disconnect any cords connected to the computer.
2. Turn the tablet computer over, back facing up.
3. Locate the Battery Lock Latch and push it to the “Unlocked” position.
4. Locate the Battery Release Slider that is spring-loaded. Pull back and hold.
5. Lift the battery out using the opening on side of battery compartment.
Connecting to Power Supply

The Tablet Computer operates either on external AC power or internal battery power.

It is recommended to use AC power when you start up the Tablet Computer for the first time.

<table>
<thead>
<tr>
<th>CAUTION</th>
<th>Use only the AC adapter included with your Tablet Computer. Using other AC adapters may damage the Tablet Computer and the Battery.</th>
</tr>
</thead>
</table>

<table>
<thead>
<tr>
<th>CAUTION</th>
<th>For users start up the Tablet Computer for the first time with internal battery power, please make sure the battery is fully charged before using.</th>
</tr>
</thead>
</table>

Perform the following to connect the Tablet computer to AC Power:

1. On the side of the Tablet computer, lift the I/O protective cover by pulling on the latch
2. Plug the DC cord of the AC adapter into the Power Jack of the tablet computer.
3. Plug the AC power cord into the AC adapter.
4. Finally, Plug the AC power cord into the electrical outlet.

When the AC Adapter is connected, the battery pack starts charging. The battery LED indicator on the tablet computer would show different states. Please refer to description of LED indicator on Description of Parts.

Powering On / Off

Powering On
Press and hold the power button for 3 seconds until the blue LED power indicator light up.

Note:
- Do not press the power button repeatedly.
- Do not perform the following operations until the Disk Activity Indicator off
  - Connecting or disconnecting the AC adapter
  - Pressing the power button
  - Touching the tablet buttons, screen, or external keyboard/mouse

Powering Off
Perform the following procedure to power off the Tablet Computer:

1. Make sure you have closed any programs that are open on the Desktop. Start Screen apps don’t need to be closed.
2. Under Windows 8.1 OS, open the Charms Bar by swiping your finger from the far right of the screen towards the middle of the screen.
3. Tap on the Settings charm.
4. Tap on Power.
5. Tap on Shut Down.
6. Wait for Tablet Computer to power off.

Note:
- The computer will forcibly be powered off if the power button is pressed and held for 6 seconds or longer.
Chapter 3: Setting Up Windows for the First Time

**CAUTION**
For users start up the Tablet Computer for the first time with internal battery power, please make sure the battery is full charged before using.

This section details how to setup different version of the Windows that may be installed on the tablet for the first time.

**Note:**
Please notice that BIOS will vary with different Windows OS; for users going to change OS, please contact our sales contact window for details.

**Setting Up Windows Embedded Standard 7 (WS7P)**

During the setup process, you create a user name and password, verify the correct time and date, and then choose your Internet network.

**Creating a user name and password**

1. Create a User name. (This user name is for the administrator of the computer.)
2. Type the selected user name in the text box, and then click **Next**.
3. On the next screen, type the password in the text box, retype the password in the next box, and then click **Next**.

**License Agreement**

The next screen requests confirmation that you accept the Software License Terms and the End User License Agreement.

Click both check boxes and then click **Next**.

**Protecting your computer**

The next screen displays options for protecting the security of your computer and for receiving Windows updates.
You have three choices:

1. Use recommended settings (automatically downloads and installs all updates provided by Microsoft)
2. Install important updates only (only downloads and installs critical updates)
3. Ask me later.

Click the option you wish to use.

Reviewing your time and date settings

The next screen contains options for changing the date and time settings.

![Time and Date Settings](image)

Verify your time zone, time, and date. Make any necessary changes. Then click **Next** to continue.

### Choosing your computer's network

If you have a home network, connect with an Ethernet cable or activate the Wireless feature before continuing.

Use the following steps to setup your computer network:

1. Choose a wireless network from the list.
2. If you do not see your network, click **Connect to a hidden wireless network**, enter the network name, and select the security type and encryption type. Or, click **Skip** to continue without a wireless connection and set it up later.
3. From the next screen, select one of the following locations for your computer:

   - **Home network**: Select this location if all the computers on this network are at your home and you recognize them. This is a trusted home network.
   - **Work network**: Select this location if all the computers on this network are at your workplace and you recognize them. This is a trusted work network.
- **Public network:** Select this location if you do not recognize all the computers on the network. (For example, you are in a coffee shop or airport, or you have mobile broadband.) This is a public network and is *not* trusted.

4. Click the location where you will most often use the computer.

**Completing Windows 7 Setup**

After completing Windows 7 setup, a Preparing your desktop screen displays. Please allow several minutes for Windows to save your settings.
Setting Up Windows 7 Ultimate/Professional

Follow the steps below to complete the setup process.

1. Press the power button to power on the computer.
2. First select your region and language information, and then tap **Next**.

3. Type in a user name for your account to be used on this PC and tap **Next**.
4. Type in a password for your account and tap **Next**

5. Now enter the product key that came with the computer and tap **Next**. For this version of the Windows, a product key entry is required when setting up the computer for the first time.
6. On the license terms screen, click on the **I accept the license terms** and tap **Next**.

7. For the update option, choose Use recommended settings for Windows to install updates. If you do not wish Windows to do so, choose the other options accordingly.
8. Next, review the date and time settings on the computer

9. Select the computer current location for network privacy setting. Choose the location below to your actual usage accordingly.
10. Allow time for windows to setup your desktop for the first time.

11. Now the computer is ready to be used.
Setting Up Windows Embedded 8 Standard

Follow the steps below to complete the setup process.

1. Press the power button to power on the computer.
2. Check I accept the license terms for using Windows to accept the terms, and then click or tap Accept.

3. On the Personalize screen, choose a color you like – you can always change this later from the Start screen.
4. In the **PC name** field, type a name for your computer, and then click or tap **Next**.

5. On the **Settings page** screen, choose **Use express settings** for the fastest setup.
6. On the **Sign in to your PC** screen, choose to create a **Local account**.

7. **Windows will then try to connect to network. Ignore attempt to connect to internet as you do not need internet connection to finish setup your pc.**
8. Type your username and password to create a local account, and then click or tap **Finish**.

9. Windows may take some time to finalize your settings.
10. On the **Windows Sign-in** screen, enter the user name and password that you set up earlier, and then press **Enter**.

11. Once Windows finishes login, you are now ready to use the PC.
Setting Up Windows Embedded 8.1 Industry Pro

Follow the steps below to complete the setup process.

1. Press the power button to power on the computer.
2. Check **I accept the license terms for using Windows** to accept the terms, and then click or tap "I Accept".

3. On the **Personalize** screen, choose a color you like — you can always change this later from the Start screen.
4. In the **PC name** field, type a name for your computer, and then click or tap **Next**.

5. On the **Settings page** screen, choose **Use express settings** for the fastest setup.
6. Windows will then try to connect to network. Ignore attempt to connect to internet as you do not need internet connection to finish setup your pc.

7. On **Your account** screen, type your username and password to create a local account, and then click or tap **Finish**.
8. Windows may take some time to finalize your settings.

9. On the **Windows Sign-in** screen, enter the user name and password that you set up earlier, and then press **Enter**.
10. Once Windows finishes login, you are now ready to use the PC
Setting Up Windows 10 IoT Enterprise

Follow the steps below to complete the setup process.

1. Press the power button to turn on the computer.

2. First, select your country/region, your preferred app language, your preferred keyboard layout, and your time zone, then tap **Next**.

3. On the **Here's the legal stuff** screen, read through the disclosures, then tap **Accept**.

4. Windows will then try to connect to network. Tap **Skip this step** to continue without a wireless connection as you can then set up the network later.
5. On the **Get going fast** screen, click **Use Express settings** for the fastest setup. If you would like more information, tap **Learn more**, or if you would like to select your own options, click **Customize settings**.

6. To create a local account, type your **User name**, **password**, and **Password hint** in the fields provided, then tap **Next**.

7. The initial setup screens are complete, and the desktop is displayed.

8. Read any introductory screens describing features of your computer, and tap **Next** upon completing each. You are now done with the initial setup process.
Chapter 4: Operating The Device

Hottab Introduction

Hottab provides quick access to the tablet’s functions and features, such as setting up shortcuts, using camera, powering on/off built-in devices, programming function key, and changing power management.

As Windows starts up, Hottab starts and runs in the background. To display the Hottab control utility, press the (Menu) Button located on the front panel, OR launching the Hottab Utility application.

The main user interface is located on the right side of the screen. There are 4 main menu options: Shortcuts, Camera, Device ON/OFF, and Settings. Operations and functions on each menu options is explained in detail in the coming section.

<table>
<thead>
<tr>
<th>Button</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Shortcuts" /></td>
<td>Shortcuts button allows users to configure short cut to quickly access programs with a few tabs.</td>
</tr>
<tr>
<td><img src="image" alt="Camera" /></td>
<td>Camera button allows users take a picture or record a video. User can also adjust setting related to camera in this menu option.</td>
</tr>
<tr>
<td><img src="image" alt="Device ON/OFF" /></td>
<td>Device button enables/disables tablet computer’s hardware functions. The configurable functions are Wi-Fi, WWAN(3G/4G/LTE), GPS, Bluetooth, Camera, LED indicators, Barcode Reader, RFID Reader, Expansion Port, and GPS Antenna routing options.</td>
</tr>
</tbody>
</table>
Setting button provides users information such as PC Information, Battery status, and also device settings such as power management setting, and function key mappings.

Shortcuts

Set up On-screen Software Shortcuts

Hottab Shortcuts Menu provides an user-friendly interface to configure on-screen software short cuts and allow users to quickly access programs with a few tabs. The Shortcuts menu offers 8 empty slots to store user’s desired quick access. Shortcuts can be mapped to any of the executable files (.exe) installed on the tablet.

Short Cut Menu:  

To store a new shortcut:

1. Open the Hottab utility by press the (Menu) Button located on the front panel, OR launching the Hottab Utility application.
2. Tap on the Shortcuts button.
3. Tap on button of any empty slot.
4. An on screen file browser will appear.
5. Browse to find the desired application to have shortcut.
6. Click “Open” to save the shortcut.

To remove an saved shortcut:

7. Open the Hottab utility by press the (Menu) Button located on the front panel, OR launching the Hottab Utility application.
8. Tap on the Shortcuts button.
9. Tap on the button of any saved slot to remove
10. Shortcut will be removed, and once again show “Empty” to indicate slot is empty.

Tap on the button will hide the Hottab Utility Menu.

Using the Hottab shortcuts:

1. Open the Hottab utility by press the (Menu) Button located on the front panel, OR launching the Hottab Utility application.
2. Tap on the Shortcuts button.
3. Tap on the saved shortcut items to access the saved programs.
Camera

Using Camera Features

This Hottab menu option allows users to take a picture or record a video. Before use, make sure the Camera is powered on under Devices ON/OFF menu with the following scenarios:

1. Open the Hottab utility by press the (Menu) Button located on the front panel, OR launching the Hottab Utility application.
2. Tap on "Device ON/OFF" button to check the built-in devices status.
3. Check the status color of the Camera icon:

<table>
<thead>
<tr>
<th>Item</th>

</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Orange</td>
<td>Camera is enabled.</td>
</tr>
<tr>
<td></td>
<td>White</td>
<td>Camera is disabled.</td>
</tr>
</tbody>
</table>

4. If the Camera feature is disabled (white), tap on the Camera icon to enable it (orange).
5. Go back to the Hottab main menu by pressing the (Menu) Button located on the front panel OR click on the back arrow on top.
6. Tap on the Camera icon to go into the Camera menu. The Camera user interface will take up the entire screen as shown below:
### Description of Camera User Interface Buttons:

Device ON/OFF

This section provides an quick access to set-up built-in devices, including turning on/off RF modules, setting up barcode reader, RFID reader, and expansion modules.

Using the Wireless LAN (Wi-Fi) feature

To use the wireless LAN(Wi-Fi) feature to connect to the network, perform the following procedure:

1. Open the Hottab utility by press the ☰ (Menu) Button located on the front panel, OR launching the Hottab Utility application.
2. Tap on the Device ON/OFF button.
3. Check the status color of the Wi-Fi icon:

<table>
<thead>
<tr>
<th>Item</th>
<th>Status Color</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Orange</td>
<td>Wi-Fi is enabled.</td>
</tr>
<tr>
<td></td>
<td>White</td>
<td>Wi-Fi is disabled.</td>
</tr>
</tbody>
</table>

4. If the Wi-Fi feature is disabled (white), tap on the Wi-Fi icon to enable it (orange).
5. Click the wireless network connection status icon in the Windows notification area. A list of available wireless networks is displayed.
6. Double-click a network to connect to it. Provide required authentication information if needed.
7. To check the connection status, observe wireless network connection status icon in the Windows notification area. The more bars the icon shows, the better the wireless LAN connection strength is.
8. Now wireless LAN connection is setup, try connection to the network with a internet browser such as Internet Explorer.

Using the Wireless WAN (3G/LTE) feature

Insert SIM card (For Optional 3G/LTE equipped device)

| CAUTION | Please power off the tablet before installing the 3G/LTE module and Micro SIM card, or the tablet computer might be damaged by the incorrect installation behaviors. |

The Tablet Computer supports data connection with 3G/LTE modules and fits Micro-SIM card. (Note: 3G/LTE feature is optional). Before using the data connection program, please perform the following procedures to insert the Micro-SIM card to your Tablet Computer:

1. Power off the Tablet Computer.
2. Remove the service window in the rear by unscrewing four screws.
3. Remove the screw that is securing the 3G/LTE module.
4. Carefully lift the 3G wireless module up, and be cautious not to damage the connected cable.
5. Make sure the SIM card IC contact patch is faced down, notch is in the direction of insertion (towards right).
6. Insert the SIM card into the slot located near the right side of the service window.
7. Reposition the removed 3G/LTE module screw to secure the 3G/LTE module.
8. Reposition the removed service window screw to secure the service window.
Use Wireless WAN Feature

For tablets equipped with wireless WAN (3G or 4G/LTE) card, to use the wireless WAN feature to connect to the network, perform the following procedure:

1. Open the Hottab utility by press the 📋 (Menu) Button located on the front panel, OR launching the Hottab Utility application.
2. Tap on the Device ON/OFF button.
3. Check the status color of the WWAN icon:

<table>
<thead>
<tr>
<th>Item</th>
<th>Status Color</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>WWAN</td>
<td>Orange</td>
<td>WWAN (3G/4G) is enabled.</td>
</tr>
<tr>
<td></td>
<td>White</td>
<td>WWAN (3G/4G) is disabled.</td>
</tr>
</tbody>
</table>

4. If the WWAN feature is disabled (white), tap on the WWAN icon to enable it (orange).
5. You can check the wireless WAN connection status through the wireless network connection status icon in the Windows notification area. The more bars encompassed, the better the signal is.

**Note:** For the Windows 7 operating system, you also can check the Access Connections gauge, the Access Connections status icon, or the Access Connections wireless status icon in the Windows notification area.
Using the GPS feature

To enable the wireless GPS feature, perform the following procedure:

1. Open the Hottab utility by press the 🍃 (Menu) Button located on the front panel, OR launching the Hottab Utility application.
2. Tap on the Device ON/OFF button.
3. Check the status color of the GPS icon:

<table>
<thead>
<tr>
<th>Item</th>
<th>Status Color</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Orange</td>
<td>GPS is enabled.</td>
</tr>
<tr>
<td></td>
<td>White</td>
<td>GPS is disabled.</td>
</tr>
</tbody>
</table>

4. If the GPS feature is disabled (white), tap on the GPS icon to enable it (orange).
5. Now the GPS feature is ready to be used with an application utilizing the GPS.

Using the Bluetooth feature

To enable the wireless Bluetooth feature, perform the following procedure:

1. Open the Hottab utility by press the 🍃 (Menu) Button located on the front panel, OR launching the Hottab Utility application.
2. Tap on the Device ON/OFF button.
3. Check the status color of the Bluetooth icon:

<table>
<thead>
<tr>
<th>Item</th>
<th>Status Color</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Orange</td>
<td>Bluetooth is enabled.</td>
</tr>
<tr>
<td></td>
<td>White</td>
<td>Bluetooth is disabled.</td>
</tr>
</tbody>
</table>

4. If the Bluetooth feature is disabled (white), tap on the Bluetooth icon to enable it (orange).
5. Click the Bluetooth icon in the Windows notification area. A contextual menu for Bluetooth is displayed.
6. To add a device, tap on Add a Bluetooth Device. Windows will search any Bluetooth device automatically
7. Choose the Bluetooth device that user wants to connect and follow onscreen prompt to continue the pair procedure and use the Bluetooth device.
Turn on/off the LED Indicators

The LED Indicators for Power Status, Battery Status, and RF Communication can be turned on/off from Hottab menu. To enable/disable the LED indicators, perform the following procedure:

1. Open the Hottab utility by press the (Menu) Button located on the front panel, OR launching the Hottab Utility application.
2. Tap on the **Device ON/OFF** button.
3. Check the status color of the **Indicator** icon:

<table>
<thead>
<tr>
<th>Item</th>
<th>Status Color</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Orange</td>
<td>LED indicator is enabled.</td>
</tr>
<tr>
<td></td>
<td>White</td>
<td>LED indicator is disabled.</td>
</tr>
</tbody>
</table>

4. If the indicator is disabled (white), tap on the **Indicator** icon to enable it (orange).
Using the Barcode Reader feature

**IMPORTANT**
The 2D/1D Barcode Reader is optional for M101B Tablet PC and is not re-workable by the end user. To use this feature, please make sure the tablet PC is built-in barcode reader before use, or contact our sales contact window for more details.

To enable the Barcode Reader feature, perform the following procedure:

1. Open Hottab utility by pressing 🏡 (Menu) Button located on the front panel, OR launching Hottab Utility application.
2. Choose “Device ON/OFF” and click on “Barcode”, and the setting utility will show up as below:

3. Tap on the **ON** button.
4. Check the status color of the **ON** button is green, and the status color of the Barcode icon on the Hottab menu is orange at the same time.

<table>
<thead>
<tr>
<th>Item</th>
<th>Status Color</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image" alt="Barcode" /></td>
<td>Orange</td>
<td>Barcode Reader is enabled. Reading will need to be triggered manually thru Fn button.</td>
</tr>
<tr>
<td><img src="image" alt="Barcode" /></td>
<td>White</td>
<td>Barcode Reader is disabled.</td>
</tr>
</tbody>
</table>

5. Open the application where barcode reader will be displaying the scanned barcode.
6. Trigger the barcode reader by pressing Fn2 function key.
### Trigger Setting

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Trigger mode options</td>
<td>User can define the barcode scanner trigger mode from <strong>Trigger mode options</strong> drop-down menu shown as below.</td>
</tr>
</tbody>
</table>

#### Continuous

Under **Continuous** mode, the barcode scanner processes auto-scan continuously. The scanning light and pattern will be always on.

#### Level

Under **Level** mode, the barcode scanner follows trigger button behavior. The scanning light will be on when the Fn2 button is triggered, and off when the barcode is successfully read or the Fn2 button is released.

#### Pulse

Under **Pulse** mode, user can define the scanning time after each trigger. The scanning light will be on when the Fn2 button is triggered, and off when the barcode is successfully read or the defined read time ends. To set up the scanning time, tap on the **Read time options** drop-down menu and choose a preferred time frame (options from 1 second to 9 seconds).
Flashing
Under **Flashing** mode, the scanning light is flashing, and the barcode scanner processes auto-scan with the same frequency.

## Settings

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sound</td>
<td>The <strong>Sound</strong> check box defines whether a beep sound will come with the data scanning.</td>
</tr>
<tr>
<td>Identifier Code</td>
<td>The <strong>Identifier Code</strong> check box defines whether to filter Application Identifiers from the scanned data. Some barcode types, such as EAN-128, use Application Identifiers to include additional data. User can disable <strong>Identifier Code</strong> check box to ignore specific characters.</td>
</tr>
<tr>
<td>Output to</td>
<td>This setting defines the output type of the scanned data. Here are the options available:</td>
</tr>
</tbody>
</table>

**Keyboard Wedge**
Under this setting, the data scanned is sent like keyboard data. The scanned data can be output directly to the demo area below this window, or user can also open other utility, such as Office Word or Notepad files, for data input.
Note: notice that the input method should support the scanned character.

User can also tap on the **Settings** button for further details settings.

### Item Description

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Prefix</td>
<td>User can type in this field to define the characters BEFORE the data scanned.</td>
</tr>
<tr>
<td>Suffix</td>
<td>User can type in this field to define the characters AFTER the data scanned.</td>
</tr>
<tr>
<td>Append Enter</td>
<td>The check box user can defines to append an “Enter” which is followed by the characters.</td>
</tr>
<tr>
<td>Append TAB</td>
<td>The check box user can defines to append an “TAB” which is followed by the characters.</td>
</tr>
<tr>
<td>Regex Filter</td>
<td>Press on “Presets…” button, user can define how many characters to show after the data scanned.</td>
</tr>
</tbody>
</table>
Replace | User can define specific characters to be replaced with preferred characters automatically. When the characters defined in Regex Substitution is scanned, the data will be replaced with the one filled in Replace with.

Reset to default | User can remove all the set up and back to default mode.

**SDK**
For users following SDK for software porting, the scanned data can also be output with the format needed.

**Virtual COM**
User can also choose Virtual COM to transfer scanned data to the defined COM port.

**Disconnect**
User can tap on the Disconnect button to stop the connection with Barcode Reader. *To recover the connection, please tap on the button again to re-connect with Barcode Reader.*

### Setting the 1D/2D Barcode Scanner Symbologies

The barcode scanner is shipped with default settings shown below. If the default setting suits the usage requirement, setting symbologies is not necessary.
Symbologies Default Settings:

<table>

If user wants to change the default setting of symbologies or other advanced setting, please

1. Refer to Page 49 to disconnect the Barcode Reader from Hottab.
2. Execute the “Easyset” barcode scanner configuration application by tapping on its icon:
(3) When “Easyset” application launches, a “Select product” on-screen prompt will show up. Select “Scan engines” and pick “ED40”. Make sure the “Online setup” option is checked, and select “OK” as shown in the screen capture below:

(4) Another “Device Selection” on-screen prompt will show up. Select “Communications Port (COM15)” and select “OK” as shown in the screen capture below:

(5) User can select Barcode code type of interest by pressing “5. Symbologies”. in the navigation pane, and it will show its configuration options.
Note:

- For more information on how to use the “EasySet” application, please refer to the complete EasySet User Manual from Intermec:
  http://intermec.custhelp.com/app/answers/detail/a_id/5760
Using the HF RFID Reader feature

IMPORTANT
The HF RFID Reader is optional for M101B Tablet PC and is not reworkable by the end user. To use this feature, please make sure the tablet PC is built-in HF RFID reader before use, or contact our sales contact window for more details.

To enable the HF RFID Reader feature, perform the following procedure:

1. Open the Hottab utility by press the ☀️ (Menu) Button located on the front panel, OR launching the Hottab Utility application.
2. Tap on the Device ON/OFF button.
3. Tap on RFID, and the setting utility will show up as below:

   ![RFID Setting Utility]

   1. Tap on the ON button.
   2. Check the status color of the ON icon is green, and the status color of the RFID icon on the Hottab menu is orange at the same time.

<table>
<thead>
<tr>
<th>Item</th>
<th>Status Color</th>

</table>
Turn on/off the GPS Ext. Antenna

**IMPORTANT**
The vehicle dock of M101B Tablet PC supports external GPS antenna through standard SMA connector. To work with external GPS antenna, please make sure the tablet PC is well installed to vehicle dock, and the vehicle dock has connected with external GPS antenna.

When working with vehicle dock connecting to external antenna, user can switch GPS antenna from the internal one to the external one from Hottab menu. To enable/disable the GPS Ext. Antenna, perform the following procedure:

1. Open the Hottab utility by press the (Menu) Button located on the front panel, OR launching the Hottab Utility application.
2. Tap on the **Device ON/OFF** button.
3. Check the status color of the **GPS Ext. Antenna** icon:

<table>
<thead>
<tr>
<th>Item</th>
<th>Status Color</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Orange</td>
<td>GPS Ext. Antenna is enabled, and using external antenna if available</td>
<td></td>
</tr>
<tr>
<td>White</td>
<td>GPS Ext. Antenna is disabled, and using built-in antenna</td>
<td></td>
</tr>
</tbody>
</table>

4. If the GPS Ext. Antenna is disabled (white), tap on the GPS Ext. Antenna icon to enable it (orange).

Turn on/off the Light Sensor

The Light Sensor can be turned on/off from Hottab menu. To enable/disable the Light Sensor, perform the following procedure:

1. Open the Hottab utility by press the (Menu) Button located on the front panel, OR launching the Hottab Utility application.
2. Tap on the **Device ON/OFF** button.
3. Check the status color of the **Light Sensor** icon:

<table>
<thead>
<tr>
<th>Item</th>
<th>Status Color</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Orange</td>
<td>Light Sensor is enabled.</td>
<td></td>
</tr>
<tr>
<td>White</td>
<td>Light Sensor is disabled.</td>
<td></td>
</tr>
</tbody>
</table>
The tablet’s advanced capacitive touchscreen has 3 built-in operating modes, for users to choose under different usage scenarios:

<table>
<thead>
<tr>
<th>Mode</th>
<th>Usage Scenario</th>
</tr>
</thead>
</table>
| **Hand/Rain Mode** | The Hand/Rain mode is the default operating mode of the touchscreen. Under this mode, the touchscreen is set to have the ability to reject false touch inputs while liquid is present on the touchscreen. Once the liquid is removed from the touchscreen, touch inputs from bare fingertips will continue to operate. Support the following input solutions:  
   - Active stylus w/ palm rejection  
   - Rubber Tip passive stylus  
   - Finger |
| **Stylus Mode** | Under the Stylus mode, the touchscreen is set to have the ability to pick up touch inputs from the fine-tip passive capacitive stylus that is shipped with the tablet. Touch inputs from bare fingertips will also continue to operate. Support the following input solutions:  
   - Fine-tip passive stylus w/ palm rejection  
   - Active stylus w/ palm rejection  
   - Rubber Tip passive stylus  
   - Finger |
| **Glove Mode**  | Under the Glove mode, the touchscreen is set to have the ability to pick up touch inputs while the user is operating the touchscreen with gloves on. Touch inputs from bare fingertips will also continue to operate. Support the following input solutions:  
   - Glove  
   - Rubber Tip passive stylus  
   - Finger |

There are 2 ways to switch between the different touchscreen operating modes:
1. Via the built-in HotTab utility
2. Via the programmable function buttons

**Switch via Built-in HotTab Utility**

To switch between the different touchscreen modes via the HotTab utility, perform the following procedure:

1. Open HotTab utility by pressing (Menu) Button located on the front panel, OR launching HotTab Utility application.
2. Choose “Device ON/OFF” and then click on “Touch Set” icon.
3. The Touch Mode Select utility will be shown as below:

![Touch Mode Select Utility](image)

4. Under the “Touch Mode”, select the desired touch modes by tapping on the radio button.

![Touch Mode Selection](image)

5. Now the touchscreen mode would behave as configured.

Here’s also additional Touch related setting to switch the touchscreen input between mouse mode with cursor, or with multi-touch mode:
### Switch via Programmable Function Buttons:

To switch between the different touchscreen modes via the programmable function buttons, make sure the touchscreen mode switching is set to the programmable function buttons first.

1. Open HotTab utility by pressing (Menu) Button located on the front panel, OR launching HotTab Utility application.
2. Tap on the Setting button.
3. Tap on F1 icon.
5. Change the Long Press function to “Touch Mode” as shown below:

<table>
<thead>
<tr>
<th>Item</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Mouse Mode</strong></td>
<td>Single touch point supported, with mouse cursor shown</td>
</tr>
<tr>
<td><strong>Multi-touch Mode</strong></td>
<td>The default setting of the touch screen supports multi-touch mode (up to 10 points)</td>
</tr>
</tbody>
</table>
Once the touchscreen mode switching is set to the programmable function button, **Long Press** on “F1” function button to cycle through the different touchscreen modes. When touchscreen mode is switched, an icon will temporarily overlay on the lower center of the screen to indicate current touchscreen mode:
Using the Expansion Module feature

**IMPORTANT**
The Expansion Port is optional for M101B Tablet PC and is not re-workable by the end user. To work with Add-on module, please make sure the tablet PC is built-in expansion port before use, or contact our sales contact window for more details.

To enable the add-on module from expansion port, perform the following procedure:

1. Open the Hottab utility by press the (Menu) Button located on the front panel, OR launching the Hottab Utility application.
2. Tap on the **Device ON/OFF** button.
3. Check the status color of the **Ext. Module** icon:

<table>
<thead>
<tr>
<th>Item</th>
<th>Status Color</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Orange</td>
<td>Expansion Module is enabled.</td>
</tr>
<tr>
<td></td>
<td>White</td>
<td>Ext. Module is disabled.</td>
</tr>
</tbody>
</table>

**NOTE:**
The Ext. Module function allows users to choose either UHF RFID Reader or Smart Card Reader.
UHF RFID Reader Module

How to Install
1. Remove expansion port cover from the rear side of Tablet PC.
2. Remove the top two screws of the I/O cover.
3. Align the pogo pin on UHF RFID module to the expansion port of Tablet PC; screw to fix the module on tablet.

How to Use
1. Open Hottab utility by pressing (Menu) Button located on the front panel, OR launching Hottab Utility application.
2. Choose “Device ON/OFF” and click on “Ext. Module”, and the setting utility will show up as below:
3. Tap on the ON button.
4. Check the status color of the ON icon is green.
**Trigger Setting**

<table>

Settings

This Hottab menu option provides users information such as PC Information, Battery status, and also device settings such as power management setting, and function key mappings. Perform the following procedure to access the Hottab Setting menu:

1. Open the Hottab utility by press the (Menu) Button located on the front panel, OR launching the Hottab Utility application.
2. Tap on the Settings button.
3. Below shows the items listed in Settings Menu.

**PC Information**

This section provides user device information in regards to BIOS Version, EC Versions, Hottab Versions, OS Versions, as well as Unit Serial Number, shown in the picture sample.

**Battery Information**

This section provides user battery Information.

**Main Battery:**
The main battery icon displays the battery level in percentages (0 to 100%).

**Backup Battery: (For M101B)**
The backup battery used for battery hot swapping displays its state in text with the following meanings.

<table>
<thead>
<tr>
<th>Status</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>High</td>
<td>Backup battery is fully charged, and can be used for hot swapping</td>
</tr>
<tr>
<td>Medium</td>
<td>Backup battery level is intermediate, but can be used for hot swapping</td>
</tr>
<tr>
<td>Low</td>
<td>Backup battery level is low, and hot swapping is not recommended.</td>
</tr>
</tbody>
</table>

**Battery Charge Time:**
The Battery Information also displays estimated time needed to fully charge the main battery when AC adapter is plugged in. Meanwhile, the backup battery is charged by the main battery.
Using the Physical Function Keys (Hotkeys)

The function key mapping menu option allows user to change the physical function buttons, Fn1 and Fn2. Users can change what application will be launched with short press or long press of keys.

To configure function key mapping, perform the following:

1. Open the Hottab utility by press the (Menu) Button located on the front panel, OR launching the Hottab Utility application.
2. Tap on the Setting button.
3. Tap on function key icon for the corresponding key that you want to change.
4. At top of utility, it will say “Short Press” or “Long Press” to indicate what type of press is being configured
5. You can switch what type of press you want to configure by tapping on the “Short Press” or “Long Press” icon at the bottom of the utility window.
6. Pick from list of preset applications by tapping on the application icons OR customize which application to execute using the picker.

Using the Custom picker:

1. Tap the icon to reveal browser window
2. Navigate to the desired executable to map to function key
3. Tap on “Done” to save selection.

To map the function key to another application:

1. Tap on the icon to remove connection to the original application, and pick again tapping on icon.

Using the physical function keys:

1. While operating the tablet, click on the physical function keys to activate functions mapped via the setup in this section.
Chapter 5: Frequently Used Settings

Screen Resolution Scaling and Setting

The M101’s 1920 x 1200 high resolution display is perfect for viewing image, video, or other applications, however, Windows user interface (icons, buttons, and other user interface elements) may be too small to read and operate at the default Windows settings. By changing the display scaling or the display resolution setting of the device, you can adjust the size of the text and other items on the desktop for optimal viewing. Display scaling is the recommended method because it has the effect of adjusting user interface element without having to move away from the optimal resolution setting at 1920 x 1200. This section will explain how you can adjust the built-in windows display scaling setting and resolution setting.

NOTE:
- The Tablet computer is shipped with display scaling set at Larger - 150%. We recommend the users set the scaling to this setting for optimal text and image viewing.
- Before proceeding to change the scaling option, make sure any opened document is saved and close, and all running applications are closed before proceeding to change the display scaling, because this procedure requires users to log out of their account to apply display scaling change.

Changing display scaling setting (Recommended)

Perform the following to change display scaling setting:

1. Tap and hold anywhere on the desktop for 3 seconds and release to bring up the context menu, and select “Screen resolution” option as shown below:
2. A “Screen Resolution” Window will show up. Select the “Make text and other items larger or smaller” option in the window, as shown below:

3. A “Display” window will show up. Under “Change the size of all items” section, change the scaling option to “Larger – 150%” or any other desired display scaling and hit “Apply” to save changes, as shown below:
4. A prompt may show up to ask if you want to sign out to apply the scaling change. Hit “Sign out Now” to apply changes, as shown below:

![Image of Microsoft Windows prompt](image)

5. The user may now log in again to Windows to see the changed display scaling already being applied.

**Changing screen resolution setting**

Alternatively, instead of changing the display scaling setting, user may choose to change the overall resolution setting to make screen elements bigger.

1. Tap and hold anywhere on the desktop for 3 seconds and release to bring up the context menu, and select “**Screen resolution**” option as shown below:

![Image of context menu](image)
2. Click on the dropdown option next to “Resolution” and select the desired resolution by tapping on the scale:

3. Hit “Apply”. A prompt “Display Settings” prompt will show up to ask the user if the applied resolution is usable.

4. If the new resolution is the desired display setting hit “Keep changes” and continue to next step. If the new resolution is not desirable, hit “Revert” and select a different resolution to change to, and start again from step 2.

5. The user may now use the device with the new resolution setting.
Replacing Hot Swappable Battery (For M101B)

The tablet computer supports hot-swapping of batteries, meaning the tablet doesn’t need to be powered off in order to replace the main battery. To support such mechanism, there is a backup battery inside the tablet that is charged up with the main battery. This backup battery cannot be removed, and needs to have adequate power for hot swapping of main battery to be done without issue. When the backup battery is fully charged, it can sustain up to 5 minutes of runtime to allow for battery hot-swapping.

Perform the following to hot swap the batteries:

1. While the tablet is powered on, go to Hottab utility to check on the power level of the Backup battery.
2. If the Backup battery level is at “Low”, please charge the tablet with AC Power until the Backup battery level is at “Medium” or “High”, and do not remove the main battery.
3. If the Backup battery level is at “Medium” or “High”, continue to remove the main battery.
4. Insert a new charged up removable battery into the battery compartment.
5. Go to Hottab utility to check if Main battery level can be correctly read. If not, check if the new removable battery is inserted properly.
6. If Main battery level can be read, continue to use the tablet computer.

CAUTION To keep battery health and prevent possible issues from battery over-discharged, please charge the tablet built-in back-up battery once for every 2 months.
Using Recovery Wizard to Restore Computer

M101B tablet computer has a dedicate recovery partition stored on the hard drive of the tablet to enable quick one-key recovery process. This partition occupies about 11GB of the storage space, and comes built-in to each M101B tablet computer.

**Warning:** Before starting the recovery process, be sure to backup all user data, as all data will be lost after the recovery process.

Follow the procedure below to enable quick one-key recovery procedure:

1. Plug-in the AC adapter to M101B tablet computer. Make sure the M101B tablet computer stays plugged in to power source during the recovery process.

2. Power on the tablet computer, and when the boot screen shows up, press the **Fn1** button (Recovery Key) on the front bezel OR press **F6** when using an external USB keyboard to initiate the Recovery Wizard.

3. The following screen shows the Recovery Wizard. Click on “Recovery” button to continue.

4. A warning message about data loss will show up. Make sure data is backed up before recovery, and click on “Yes” to continue.
5. Wait till the recovery process to complete. During the recovery process, a command prompt will show up to indicate the percent of recovery process.

6. After recovery is completed, please press any key to continue, and the tablet computer will restart automatically.
How to change OS

M101B is shipped with pre-installed OS based on your order. You will require to follow procedures included in this OS Installation Guide if you want to install OS by yourself.

For M101B series, change the BIOS setting (UEFI/LEGACY mode) to install OS.

Changing BIOS Settings (UEFI/LEGACY mode) to Install OS

This section describes how to change UEFI/LEGACY mode in BIOS settings to install OS that is different from Winmate’s shipment.

Default Windows 8.1 / 10 change to Windows 7

The instruction below describes how to change Windows 8.1 / 10 to Windows 7.

1. Enter BIOS Setup utility.
2. Go to “Miscellaneous Configuration” at BIOS setup menu.
3. Change OS setting to Windows 7
4. Go to CSM Configuration, change **Storage and Video** to Legacy only.
5. Go to Boot menu and change setting Boot Mode select to LEGACY.

**Default Windows 7 change to Windows 8.1 / 10**

1. Enter BIOS Setup menu.

2. Go into item “Miscellaneous Configuration” at BIOS setup menu.
3. Change OS setting to Windows 8.X.

4. Go to CSM Configuration, change Storage and Video to UEFI.
5. Go to Boot Page and in the Boot Mode setting select to UEFI.
6. Now you can refer “How to change boot order.doc” put your install device to Boot Option #1 then you will start install process.

**IMPORTANT:**
Pay attention to the mode you created on the Recovery DVD. PE3.0 only support legacy mode for Windows 7, PE5.0 can support Win7/8/8.1 at legacy or UEFI mode. Creation and installing processes of the chosen mode must match.
Docking Connector Pin Definition

M101B tablet computer supports one 19-pin docking connector at the bottom side. The pin definition is listed as the following table.

<table>
<thead>
<tr>
<th>Pin No.</th>
<th>Description</th>
<th>Pin No.</th>
<th>Description</th>
</tr>
</thead>
<tbody>

For some special applications, user might re-install OS and lose the COM port settings. To make sure the features works properly with Hottab utility, please follow the procedure below to re-define the COM port numbers:

1. Go to "Device Manager", right click on the COM number need to be changed, and tap on "Properties" to open the setting page.
2. Tap on "Port Setting" tab and click on "Advanced" button.

3. Tap on the dropdown list and choose the correct COM Port Number (refer to the COM Port Definition Table), and click "OK".

4. Double check "Device Manager" to make sure the COM Port number has been re-defined successfully, and then restart the system.
Pairing with a Wireless Bluetooth Barcode Scanner with Bluetooth Serial Port Profile

The computer is affixed with a Bluetooth MAC (Media Access Control) address barcode label that enables wireless Bluetooth Barcode Scanner to quickly establish Bluetooth connection with the computer. It is encoded with leading characters to instruct the wireless Bluetooth barcode scanner to initial Bluetooth Serial Port Profile pairing request.

Setup Computer for Bluetooth Pairing

To start the pairing process, first perform the following steps to ensure the computer is properly setup for pairing:

1. Locate the Bluetooth icon in the Notification Area

2. Bring up the Contextual Menu by performing long press on the icon with touchscreen or right-click on the icon with a mouse, and select Open Settings.

3. Once the Bluetooth Settings Menu appears, go to “Options” tab, and make sure that in the Discovery section, the computer is set to “Allow Bluetooth devices to find this computer”, as shown below:
4. In the **Bluetooth Settings** menu, go to “**COM Ports**” tab. COM port has to be setup for the wireless Bluetooth Barcode Scanner to communicate via the Bluetooth Serial Port Profile. Click on the “**Add...**” button.

Click **OK** to continue.
5. You are in “Add COM Port” window. Choose “Incoming (device initiates the connection)”, and click “OK”.

6. The computer will automatically assign COM Port to the Bluetooth connection. In the screenshot below, COM5 is allocated.

Click OK to continue.

7. Next, the user has to configure the application that is used to accept the scanned data from the wireless Bluetooth Barcode Scanner. The application has to be configured to accept the same COM Port that has been assigned for the Bluetooth Serial Port Profile in the previous step.

**IMPORTANT:**

Make sure the application stays open while pairing.

8. Now the computer is ready for pairing process to start
Set up the Barcode Scanner for Bluetooth Pairing

IMPORTANT
The wireless Bluetooth Barcode Scanner has to be configured as Bluetooth Serial Port Profile Master device to establish connection via Bluetooth MAC address barcode label. For a more detailed instruction, please refer to the User Guide for the wireless Bluetooth Barcode Scanner you are using for paring.

Now the Barcode Scanner is ready for pairing process to start.

Perform Bluetooth Pairing
After you finish setting up both the Computer and Barcode Scanner you are ready to start pairing.
1. Open a program that is used for paring.
2. Perform scanning procedures. A Bluetooth notification window pop-up on the right hand side of the desktop. **Left click** on the mouse to enter Add a device menu.

3. In **Add a device** window, click **Next** to connect the Barcode Scanner to the Computer.
4. The Barcode Scanner has successfully been added to this computer. Click **Close** to exit “Add a device” menu.

In order to ensure that Bluetooth Device is successfully paired to the Computer, follow the steps below:

5. Locate the **Bluetooth** icon in the Notification Area. Select **Show Bluetooth Devices**.

You can access this menu in the Control Panel:

Windows ➔ Control Panel ➔ Devices and Printers ➔ Bluetooth Devices
6. Make sure your device is connected to the Computer.
